PROFESSIONAL SUMMARY

Motivated and creative fourth-year Interior Design student passionate about expanding my creative and technical skills while developing independence, confidence, and strong client collaboration. With hands-on experience in sustainable residential, hospitality, and retail projects, I strive to create innovative, functional, and meaningful spaces. I am particularly passionate about biophilic and community-based design, focusing on environments that enhance user experiences and overall wellbeing.

SKILLS & SOFTWARE

AutoCAD | Revit | SketchUp | Twinmotion | Design Research | Customer Relation Skills | Creative Problem Solving | Strong Collaboration Skills | Strong Communication | Sustainable Design Practice

Develop floorplans, details, millwork, elevations, sections, 3D models, and renders for residential and commercial school projects.

ACADEMIC PROJECTS

The Future of Workplace Design - Designed a future-forward, innovative office concept with multi-functional spaces, producing working drawings while integrating finishes, technology, biophilic design, and workplace wellness strategies to balance focus, collaboration, and restoration.

Culture Driven Restaurant Design - Designed a research and culture driven restaurant, focusing on space planning, finishes and material selection, as well as guest experience flow.

Passive House Residential Design - Developed detail working drawings, energy consumptions and reductions, as well as finish and material specifications to ensure a certified Passive House.

Redefining Healthcare Waiting - Collaboratively designed a restorative healthcare environment inspired by hydrotherapy, incorporating hot and cold therapy, gentle transitions, and supportive spaces to reduce stress and promote wellbeing.
